HOW IS THAT POSSIBLE?

Porter's Fireworks has built a better mousetrap with the **KNITRO WARHAMMER!** First, we've created more balanced lift and break charges due to very high compression packing of every last grain of the allowable 60 grams of composition for a more intense release of energy. Then, we use ALL of the allowable 1.75" diameter shell canister. This, combined with the shrinking of the lift and break charges due to intensified compression allow us to pack in star pellets for much more robust and thicker bodied breaks than the competition. Finally, we added intense colors and effects for truly PRO STYLE SHELLS that rise high, break full and hit hard!

Porter's has always been famous for our superior canister shells, but we've now taken it to a whole new level!

BETTER DESIGN – BETTER BUILD – BETTER SHELL
